

EXOCLAD QUICKCLIP RAINSCREEN SIDING SYSTEM

The only flexible, resilient clip system designed for natural expansion and contraction. ExoClad QuickClip offers an ideal solution for Accoya siding, ensuring a quicker and easier installation compared to traditional fastening systems. Specifically designed for wood siding, the QuickClip maximizes longevity by creating a necessary 3/4" gap behind each board. This innovative design allows the boards to naturally swell and shrink in response to changes in humidity, ensuring both ease of installation and long-term durability.
