MILLBOARD DECKING

Transform your outdoor space and create unforgettable moments with Millboard's resin mineral composite decking (RMC), where beauty meets durability.

Disappearing screws

Durafix screws are virtually hidden beneath the unique Lastane surface.

Natural wood look

Molded from selected hardwood for an organic, realistic wood-grain appearance.

High slip-resistance

Lower slip potential than wood due to the pliable Lastane layer.

Low maintenance

No staining or oiling. Only seasonal cleaning is required.

WEATHERED OAK

NATURAL BEAUTY | 3 COLORS

Beautifully aged in appearance, our Weathered Oak collection is molded by hand from century-old oak boards.

WEATHERED OAK [∨] DRIFTWOOD

WEATHERED OAK [∧]
EMBERED

WEATHERED OAK [∧]
VINTAGE

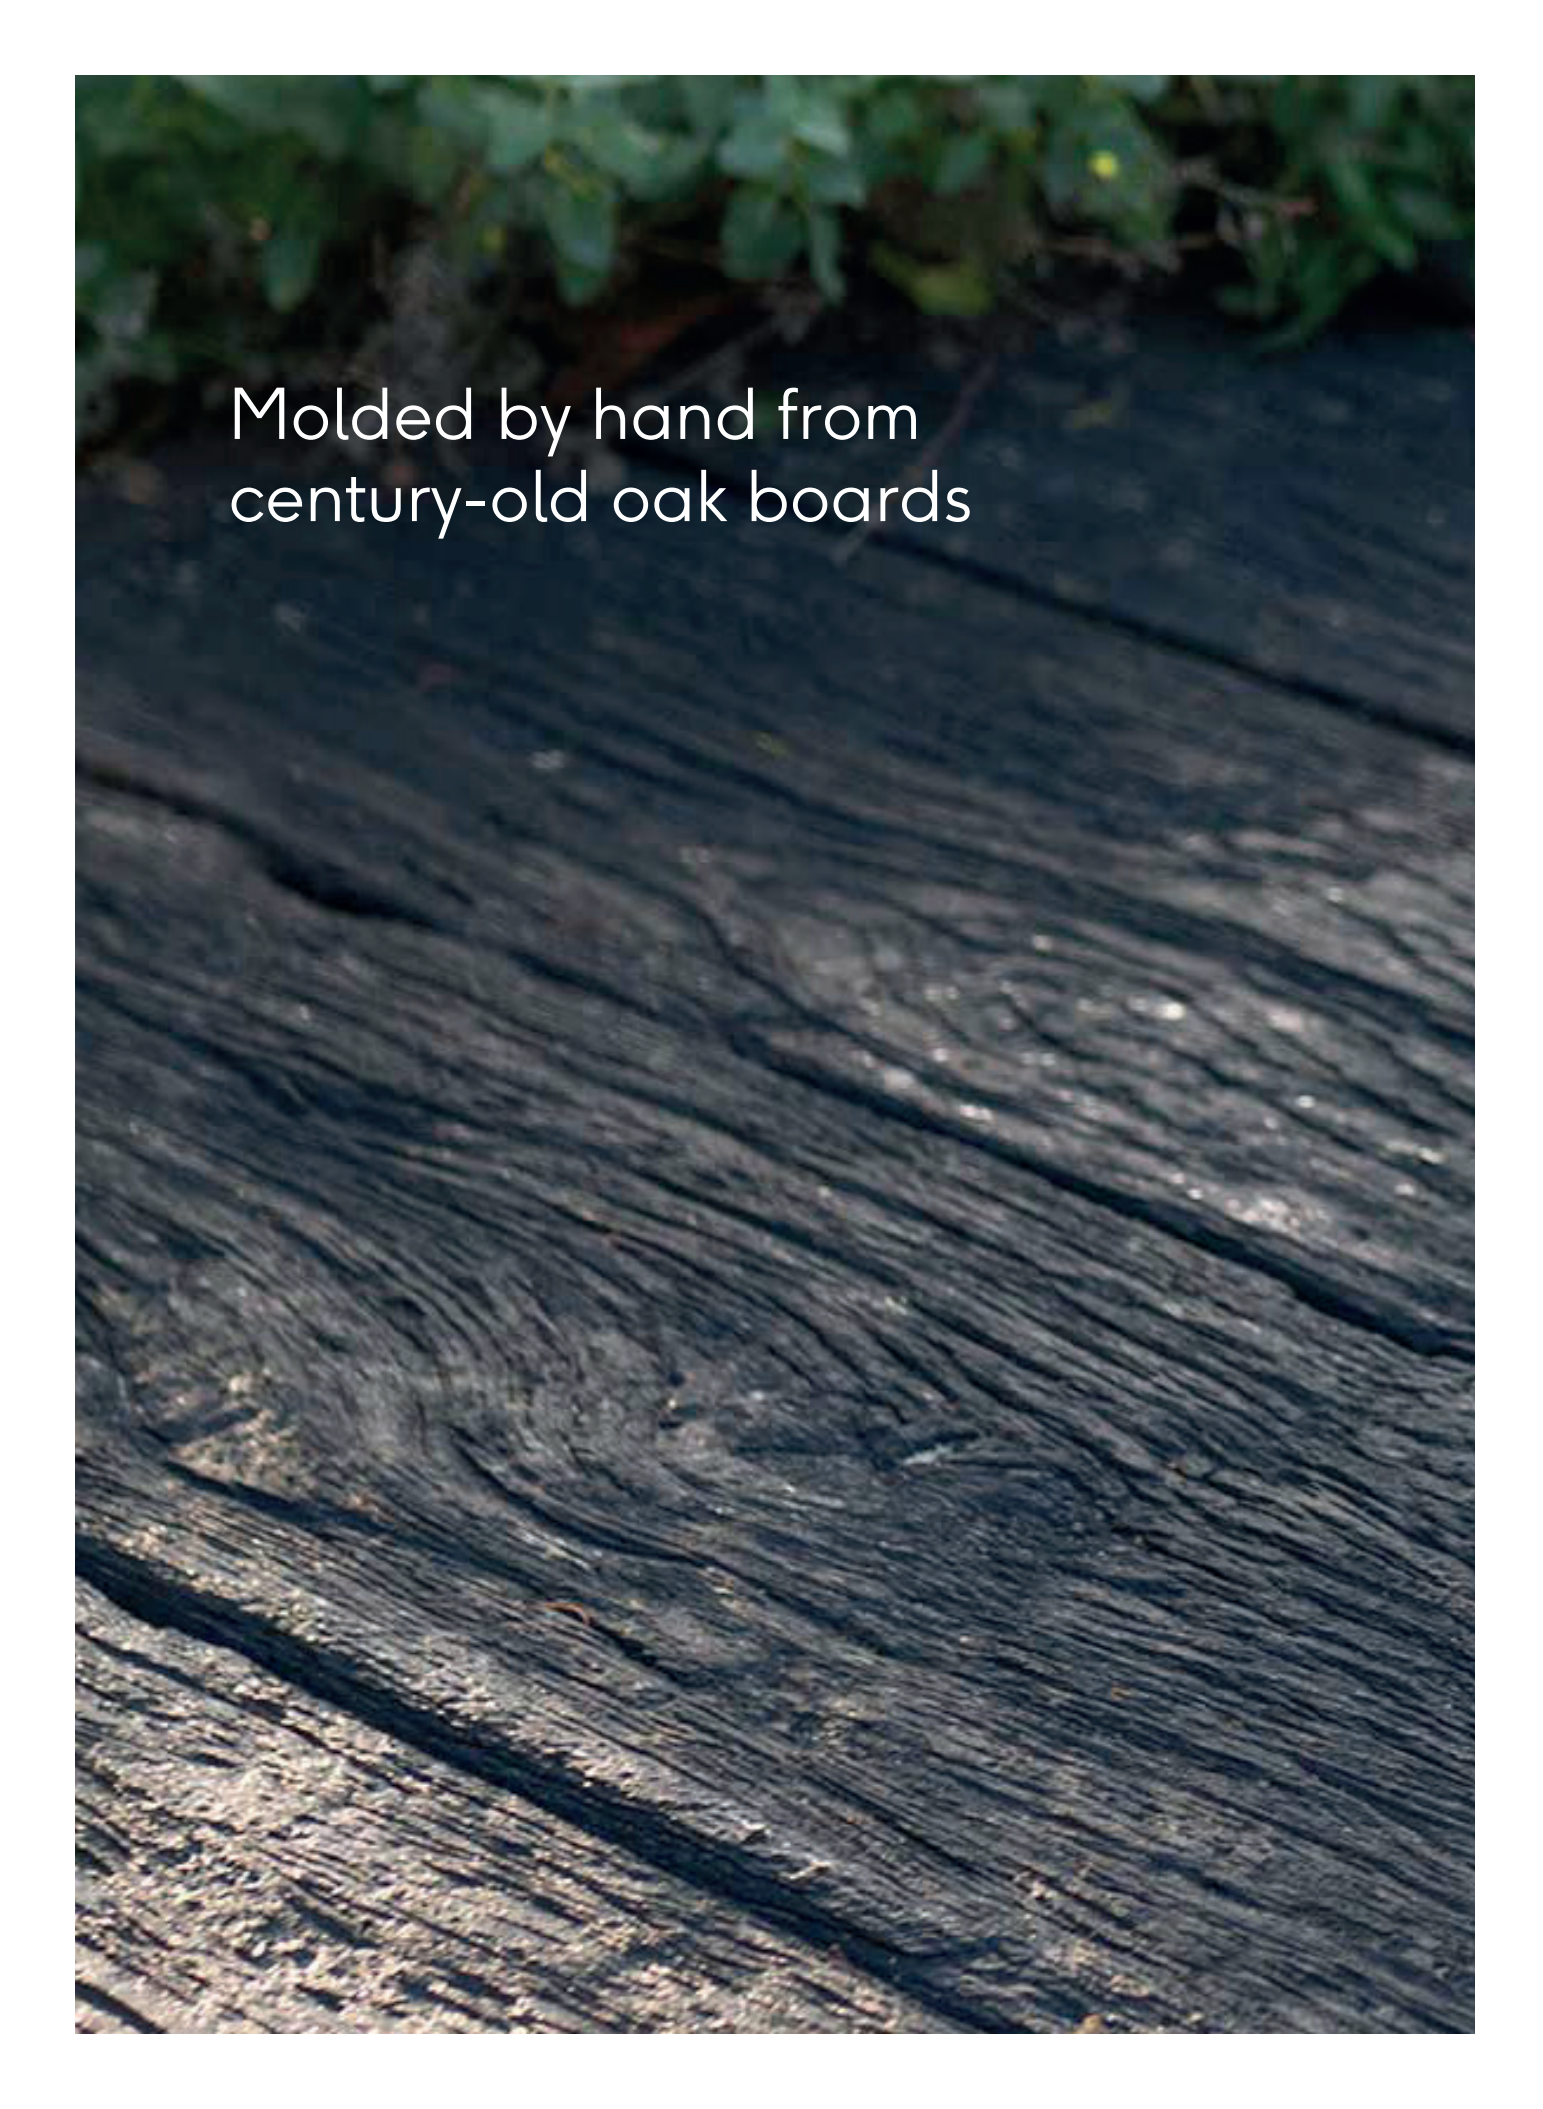

WEATHERED OAK [∧]
DRIFTWOOD

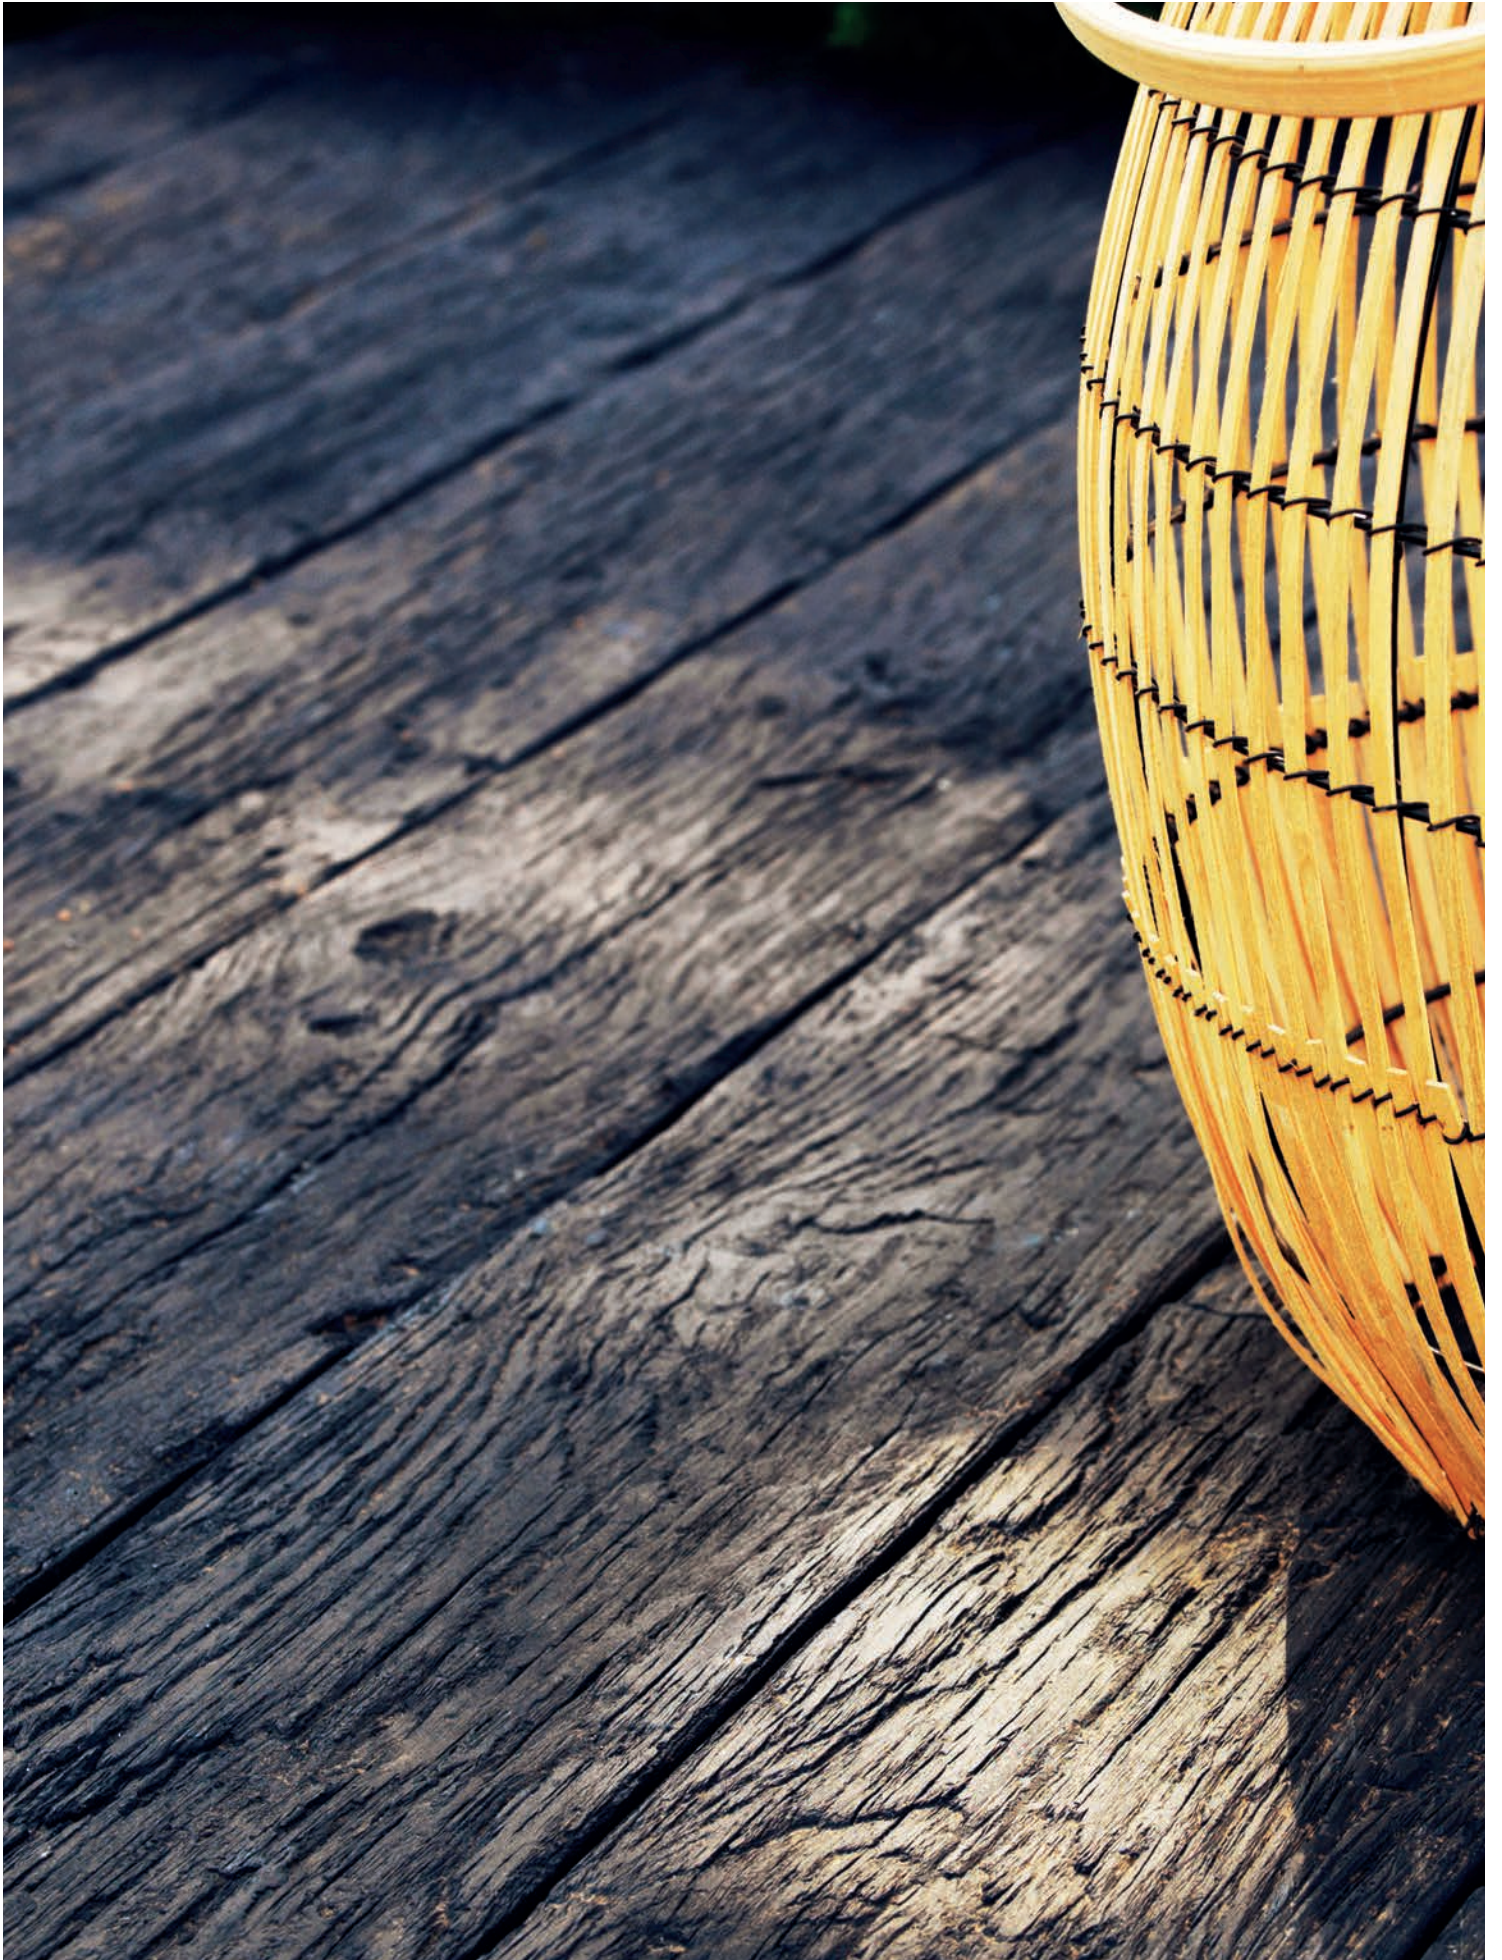

A wide-angle photograph of a wooden deck overlooking a lake and a dense forest of tall evergreen trees. The deck is made of dark, weathered oak planks. A modern railing with blue posts and silver cables runs along the edge of the deck. In the background, a calm lake reflects the sky, and a small boat is visible in the distance. The sky is overcast with soft, diffused light. On the right side of the deck, there is a wooden outdoor sofa with light-colored cushions and a small white table.

Simulating the timeless
elegance of aged oak

A close-up photograph of dark, weathered oak wood. The wood grain is highly textured and wavy, showing deep grooves and ridges. The color is a dark, almost blackish-brown, with some lighter, yellowish-brown spots where the wood is more worn or exposed. In the upper left corner, there is a blurred area of green foliage, likely leaves of a plant. The overall lighting is soft, highlighting the intricate details of the wood's surface.

Molded by hand from

LASTA-GRIP

ADDED SAFETY | 2 COLORS

Our Lasta-Grip collection combines the attractive appearance of our Enhanced Grain boards with a unique textured design that offers outstanding slip-resistance without the rough feel of conventional gritted strip boards. Perfect for commercial areas where safety is paramount, but appearance is important.

ENHANCED GRAIN 
LIMED OAK - OUTDOOR KITCHEN

Unlike other composites, Millboard possesses the remarkable capability to be shaped, enabling you to seamlessly craft stunning curved structures without any visible fasteners. This is thanks to the distinctive composition of Millboard's Resin Mineral Composite (RMC) core and its flexible Lastane surface layer.

Available across all the range including flexible edgings and fascia.
